

KENDALLVUE SCHOOL

SERVING 350 STUDENTS FAMILIES

Kendallvue Elementary is a public school welcoming 350 students and families.

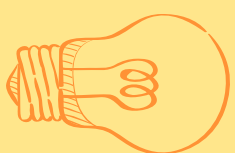

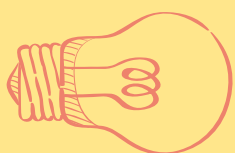

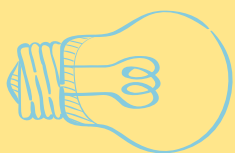

We offer programs and education for students preschool through 5th grade.

Our campus features an innovation lab, filming studio, industrial arts shop, garden, robotics, natural play spaces, outdoor learning environment, and a robust library.

EARLY CHILDHOOD

Our youngest learners explore new experiences in social settings with their peers and highly trained teachers every day. They learn, play, create and explore the natural world together.

PRESCHOOL

Kendallvue's preschool program focuses on a child's natural development. Our approach is child-centered, play based, and shares the philosophy that learning must make sense to the student in order to be effective and meaningful. A child's driving sense of curiosity, along with their inherent potential ultimately sets them on a path of life long learning.

ELEMENTARY SCHOOL

At Kendallvue Elementary we build upon student interests and life experiences while transforming student learning to a higher level of authenticity and real-world application. Our students have the opportunity to engage with 1:1 technology, an Innovation Lab, robotics, after school programs, band or orchestra, wood shop, and our community garden. By learning resilience and perseverance, students set goals that impact not only their education, but also allows them to take calculated risk. These experiences develop critical thinking and problem solving skills that carry students through a successful life.

OUR TEACHERS AND EDUCATORS

We are proud of our highly qualified teachers at Kendallvue. They are passionate and dedicated to their work with learners.

Many classrooms also have an education intern working towards a degree in elementary education. This stems from our partnership with MSU.

Fortunately we also have Para Educators who enrich student learning in and out of the classroom.

FIELD TRIPS AND OVERNIGHT TRIPS

All of our students participate in a variety of field trips and overnight experiences that provide authentic learning.

When students look outside the classroom, they see the connections between what is happening at school and in their community.

They begin to see that what they learn within the walls of the classroom helps them solve the problems they see in the world around them and can have a direct impact on who they become as people.
