The Kendallvue Community School is a public school welcoming over 550 students and families. We offer programs and education for students from 6 weeks to 11 years. We are open 11.5 hours a day, and our early childhood programs are open 12 months a year. Our 100,000 square foot building features an innovation lab, lightroom, industrial arts shop, science lab, garden, theater and a large courtyard in the center of the facility.

**Early Childhood**

Our early childhood students explore new experiences in social settings with their highly trained teachers every day. They learn, play and create together, and explore the natural world.

**Preschool**

The preschool program continues the experiences of our younger students by exposing them to continued group learning, socializing with younger and older students, and natural play space where they can be creative and imaginative while integrating cognitive challenge and rich language.

**Elementary School**

The Kendallvue Community School elementary program builds upon student’s early childhood experiences while transforming student learning to a higher level of authenticity and real-world application. By learning resilience and perseverance, students set goals that impact not only their education, but also allows them to take calculated risk. These experiences develop critical thinking and problem solving skills that carry students through a successful life.
Our Teachers and Educators

The teachers at the Kendallvue Community School are highly qualified educators with bachelor’s and master’s degrees. In addition to having a highly qualified educator, classrooms also have an education intern working towards a bachelor’s degree. This pairing allows for students to receive an increased amount of one on one time with educators to help individualize education for every student. Our infant and toddler programs also have a minimum of 2 qualified educators in each room with associate’s or bachelor’s degrees in early childhood education to provide the highest level of learning to our youngest students. Many of our early childhood classrooms have interns working on degrees in early education, adding to the individualization for young learners.

Field Trips and Overnight Trips

All of our students participate in a variety of field trips and overnight experiences that provide authentic learning. When students leave the classroom, they see the connections between what is happening at school and in the ‘real-world’. They begin to see that what they learn within the walls of the classroom can help them solve the problems they see in the world around them and can have a direct impact on who they become as people.
